EXPLANATION OF DATES ON U. S. COAST AND GEODETIC SURVEY CHARTS

All U. S. Coast and Geodetic Survey charts bear below the border line a note indicating the date on which they were issued from the office in Washington, D. C., or Manilla, P. I. The form of this note is—

LIGHTS, BEACONS, BUOYS, AND DANGERS CORRECTED
FOR INFORMATION RECEIVED TO DATE OF ISSUE (date).

It should be understood that no additional information relative to lights, beacons, buoys, and dangers which could be charted had been received previous to this date. It is therefore unnecessary for a mariner to examine his file of Notice to Mariners of date prior to the date of issue of the chart for such corrections.

Other dates which appear on these charts are of less importance to mariners, but are necessary for the identification of the edition and print of the chart, and should be understood by those who use the chart.

A note, known as the authority note, gives the dates (years) of the surveys from which the chart was constructed. This note reads as follows:

AUTHORITIES:

SURVEYS (date).

The surveys are by the U. S. Coast and Geodetic Survey unless otherwise stated.

When a new chart is issued, the date (month and year) is printed in the publication note.

PUBLISHED AT MANILA, P. I. (date),
BY THE U. S. COAST AND GEODETIC SURVEY
E. LESTER JONES, Director.

This note is always placed just below the border of the chart and as near a central position as possible. The date in this note remains unchanged until an extensive correction is made on the plate from which the chart is printed. The date is then changed and the issue known as a new edition.

When a correction, not of sufficient importance to require a new edition, is made to a chart plate, the year, month, and day are noted below the border in the left-hand corner of the chart, thus: 20-6/30, 7/22, 21-2/3, 5/27.

EXPLANATORY NOTES

The charts embraced in this catalogue are constructed on different scales in order to adapt them to the different conditions of navigation. The small-scale charts include large areas and are suited to offshore navigation, while those on large scale include small areas and are suited to alongshore navigation.

They are classified as follows:

SAILING CHART.—Scale, 1: 1,600,000.

It is intended for the use of the navigator to fix his position as he approaches the coast from the open ocean or when sailing between distant coast ports. It shows the offshore soundings, the principal lights and outer buoys and such natural landmarks as may be visible at a considerable distance.

GENERAL CHARTS OF THE COAST.—Scales from 1: 400,000 to 1: 800,000. They are intended for coastwise navigation when the vessel's course would mostly be within sight of land, with her position fixed by landmarks, lights, outer buoys, and characteristic soundings.

COAST CHARTS.—Scales from 1: 100,000 to 1: 200,000. They are intended for close coastwise navigation when a vessel's course would carry her inside outlying reefs and shoals; also for entering bays and harbors of considerable width and for navigating the large inland waterways.

HARBOR CHARTS.—Scales from 1: 5,000 to 1: 80,000. They are intended for navigation of harbors and small waterways.

CHARTS, COAST PILOTS, TIDE TABLES, AND NOTICE TO MARINERS RELATING TO THE PHILIPPINE ISLANDS PUBLISHED BY THE U. S. COAST AND GEODETIC SURVEY

The charts are arranged in this catalogue in numerical order and the limits of the charts are graphically shown on diagrams on adjoining pages.

Agencies for the sale of the charts, coast pilots, and tide tables of the U. S. Coast and Geodetic Survey.

Philippine Islands:

Cebu—Pacific Commercial Co.

Iloilo—Hoskyn & Co.

Manila—* Luzon Stevedoring Co., between Pier 3 and Pier 5, Port Area.

†U. S. Coast and Geodetic Survey Field Station, Intendencia Building.

Zamboanga—Francisco Barrios & Co.

Hawaii:

Honolulu—*Honolulu Paper Co. (Ltd.)

Agents marked with an asterisk (*) also handle Hydrographic Office publications. Agents marked with a dagger (†) also handle Lighthouse Service publications.

COAST PILOTS

Philippine Islands, Part 1.—Luzon, Mindoro, and Visayas, 8vo, canvas, 1919, with supplement to Jan. 1, 1925.
Price, 75 cents.

Philippine Islands, Part 2.—Palawan, Mindanao, and Sulu Archipelago, 8vo, canvas, 1921, with supplement to Jan. 1, 1925. Price, 75 cents.

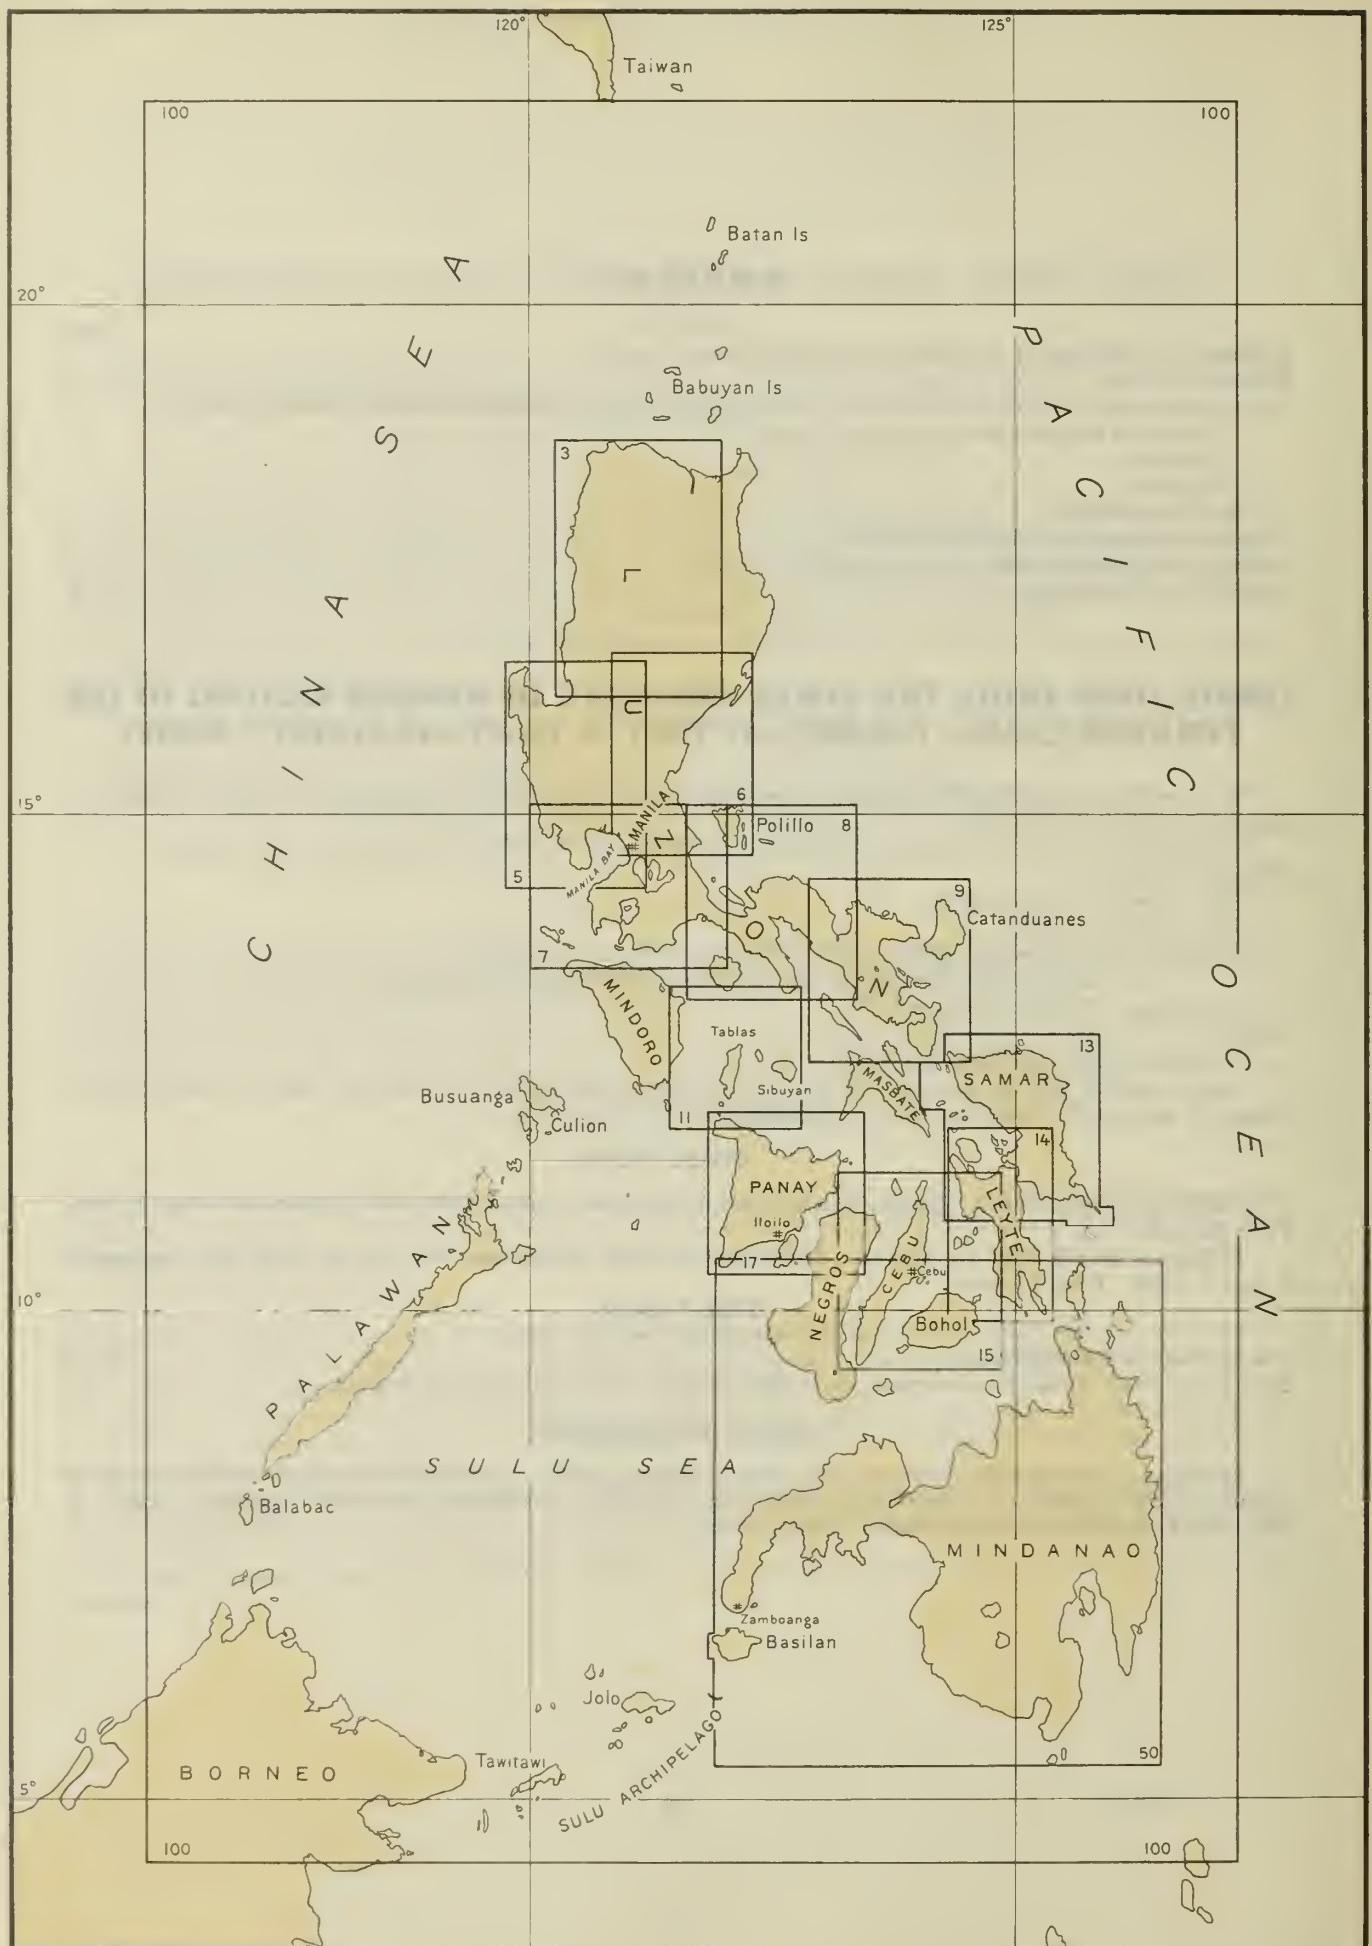

TIDE TABLES

[Published annually six months in advance]

	Price
United States and Foreign Ports.....	\$0.75
Pacific Coast Tide Tables for western North America, eastern Asia, and many island groups.....	.15

NOTICE TO MARINERS

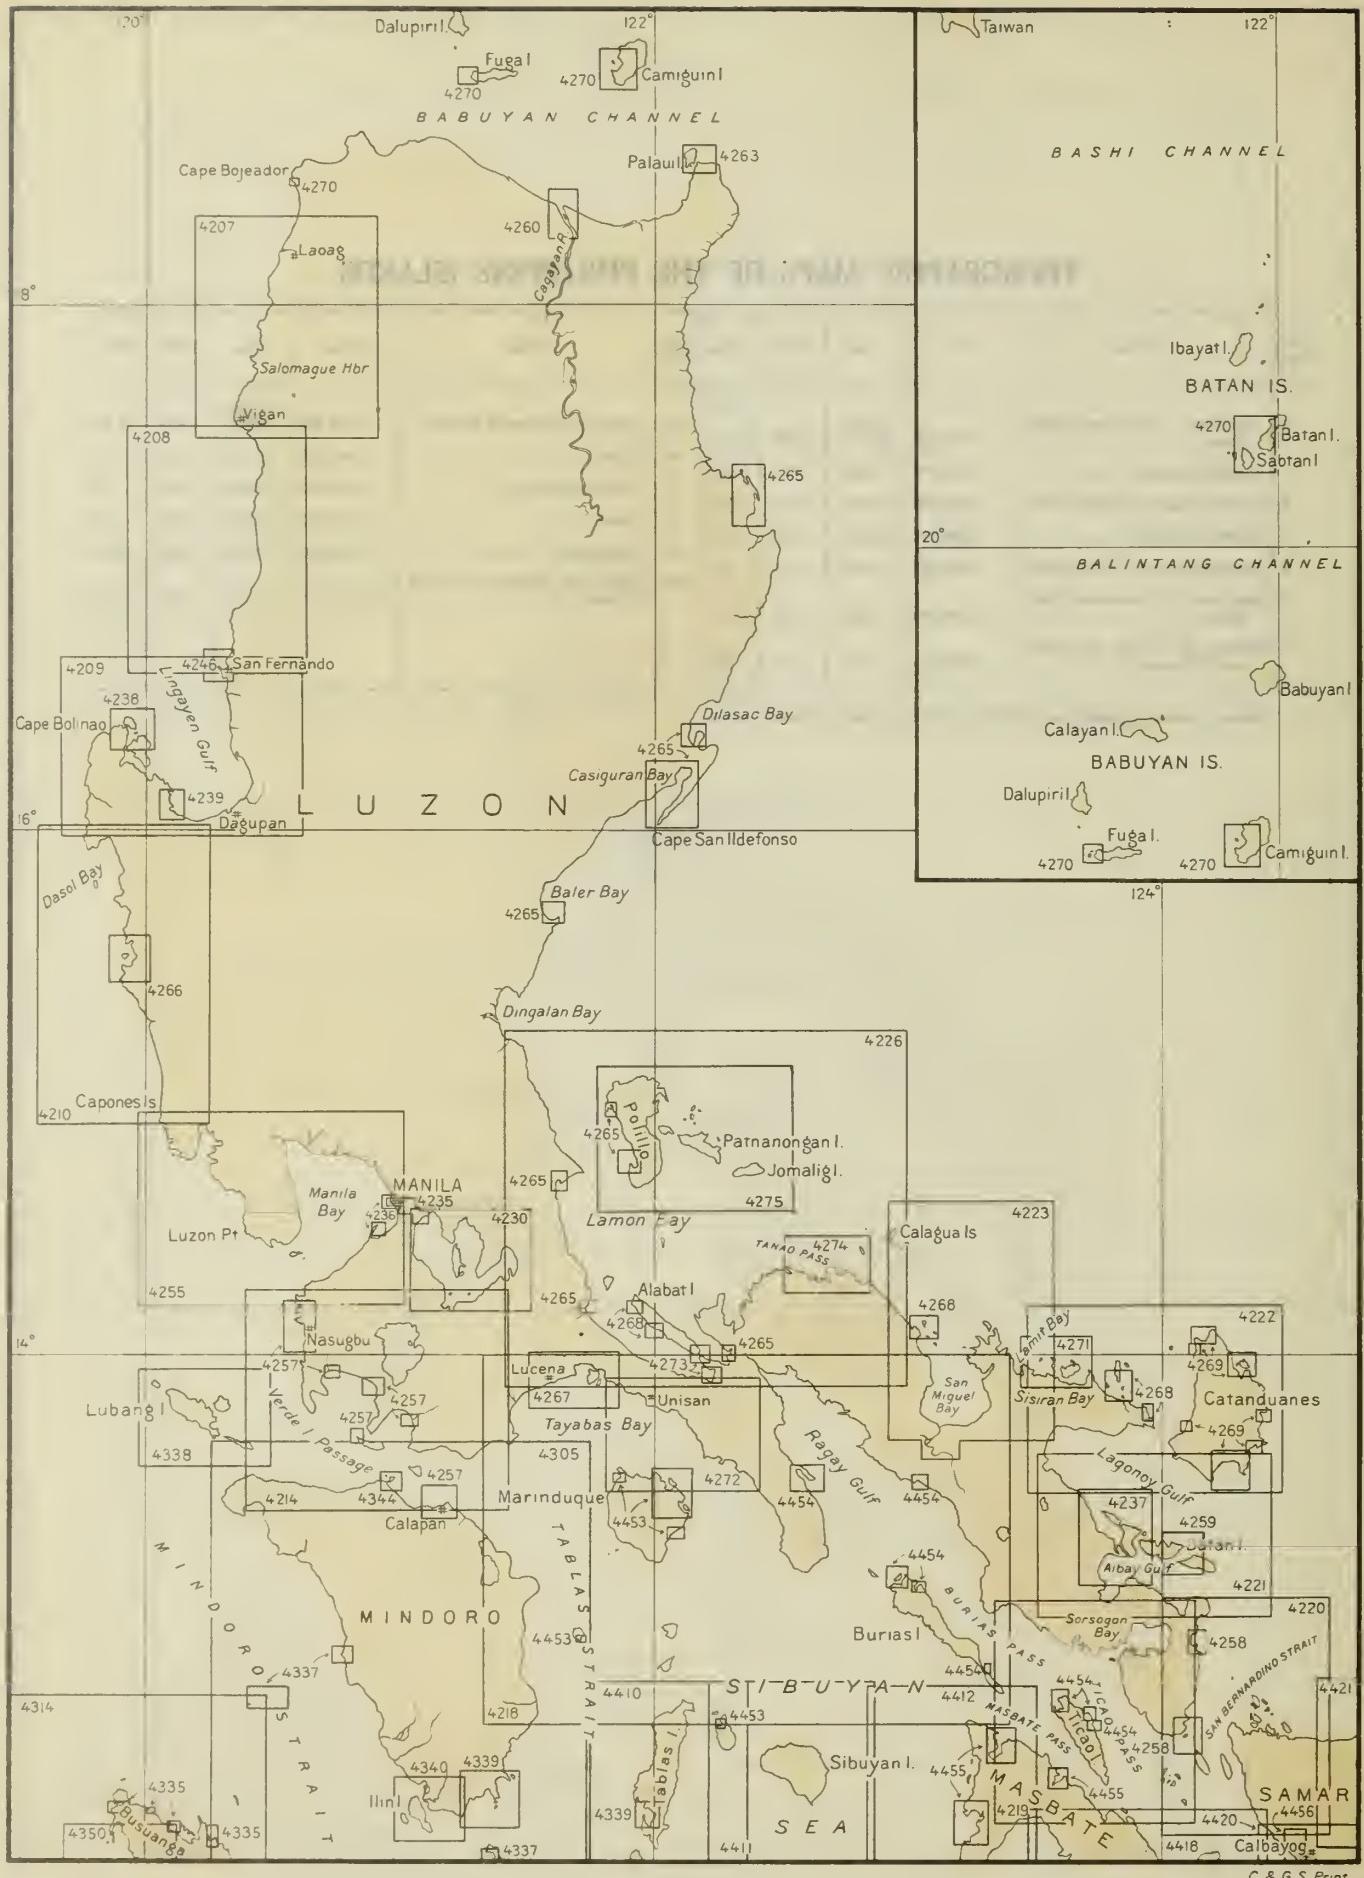

Corrections to be applied to charts to keep them up to date and the announcement of new charts, new editions of charts, and new publications of the Philippine Islands are included in the Notice to Mariners, published by the U. S. Coast and Geodetic Survey Field Station, Manila, P. I.

TABLE OF SCALE EQUIVALENTS

The following table gives the lengths of nautical and statute miles on the several scales named, these scales being the proportionate size of the chart to nature. That is, in the scale 1:1,200 the chart is 1:1,200 part of the actual linear dimensions in nature (or 100 feet to the inch), equal to 60.8 inches to a nautical mile, and 52.8 inches to a statute mile, and so on.

A nautical mile is a minute of an average great circle of the earth, and its length is 6,080 feet, or 1,853.2 meters. A statute mile is 5,280 feet, or 1,609.3 meters.

Scale	Nautical mile		Statute mile	
	Inches	Centimeters	Inches	Centimeters
1:1,200	60,803	154.44	52,800	134.11
1:2,400	30,401	77.22	26,400	67.06
1:4,800	15,201	38.61	13,200	33.53
1:5,000	14,593	37.06	12,672	32.19
1:10,000	7,296	18.53	6,336	16.09
1:15,000	4,864	12.36	4,224	10.73
1:20,000	3,648	9.27	3,168	8.05
1:30,000	2,432	6.18	2,112	5.36
1:40,000	1,824	4.63	1,584	4.02
1:50,000	1,459	3.71	1,267	3.22
1:60,000	1,216	3.09	1,056	2.68
1:80,000	.912	2.32	.792	2.01
1:100,000	.730	1.85	.634	1.61
1:200,000	.365	.93	.317	.80
1:400,000	.182	.46	.158	.40
1:1,000,000	.073	.18	.063	.16
1:1,200,000	.061	.15	.053	.13

1 meter=39.37 inches; 1 centimeter=0.3937 inch; 1 inch=2.54 centimeters.
